

# E-commerce Sales Dashboard Analysis

Data-Driven Sales Strategy with Excel

Turning Raw Data into Business Insights

2025

# Introduction

01. Built an interactive dashboard + Excel project
02. Based on a real-world E-commerce dataset
03. Goal: Convert raw transactions into clear, actionable insights
04. Focus: Revenue Growth & Operational Efficiency

# Business Problem

Modern E-commerce companies face challenges:

Huge volumes of daily sales data across multiple categories & regions

Lack of clear visibility into profitable vs loss-making segments

Difficulty in controlling underperforming products & optimizing pricing

1

2

3

4

5

6

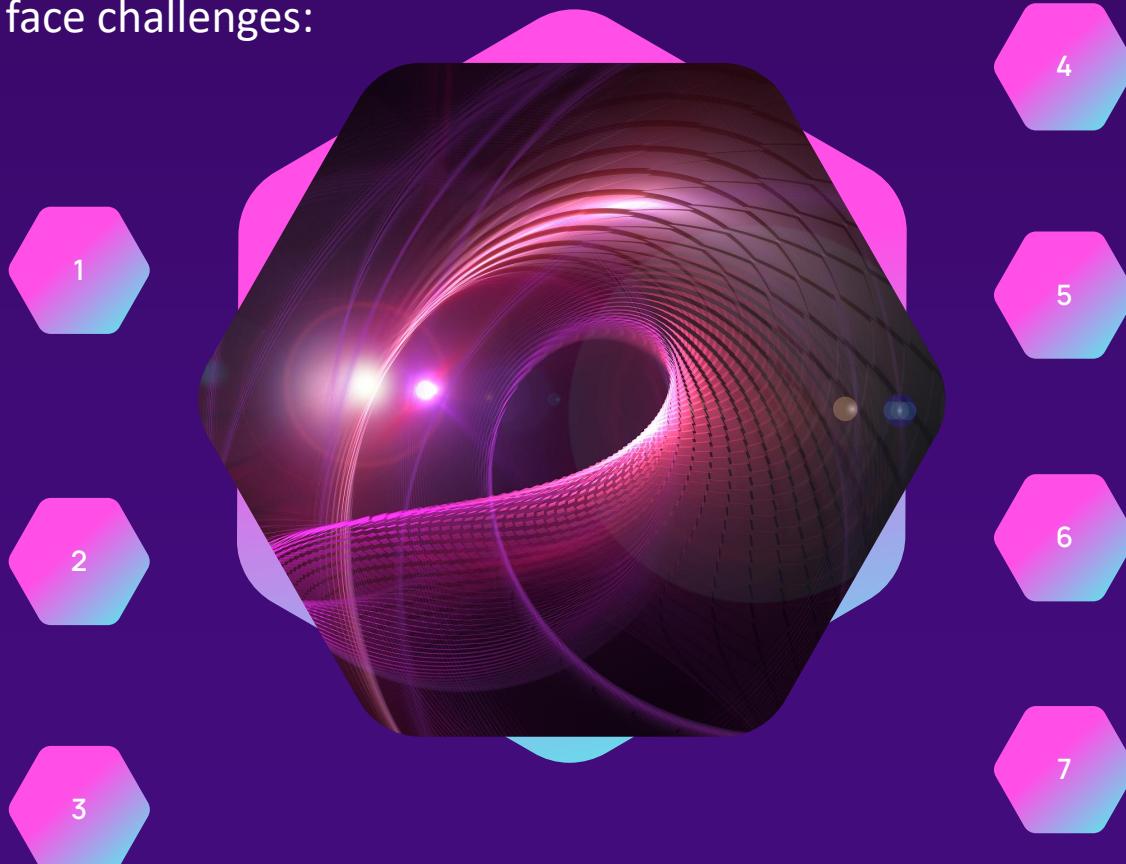

7

Complex inventory and stock management across locations

Tracking diverse payment modes & evolving customer trends

Struggle to achieve sales targets consistently

Limited insights for effective local & regional marketing campaigns

# Challenges Without Dashboard

No centralized sales performance view

Missing clarity in product vs category profitability

Gaps in forecast vs actual sales

Struggles in regional / city-level targeting

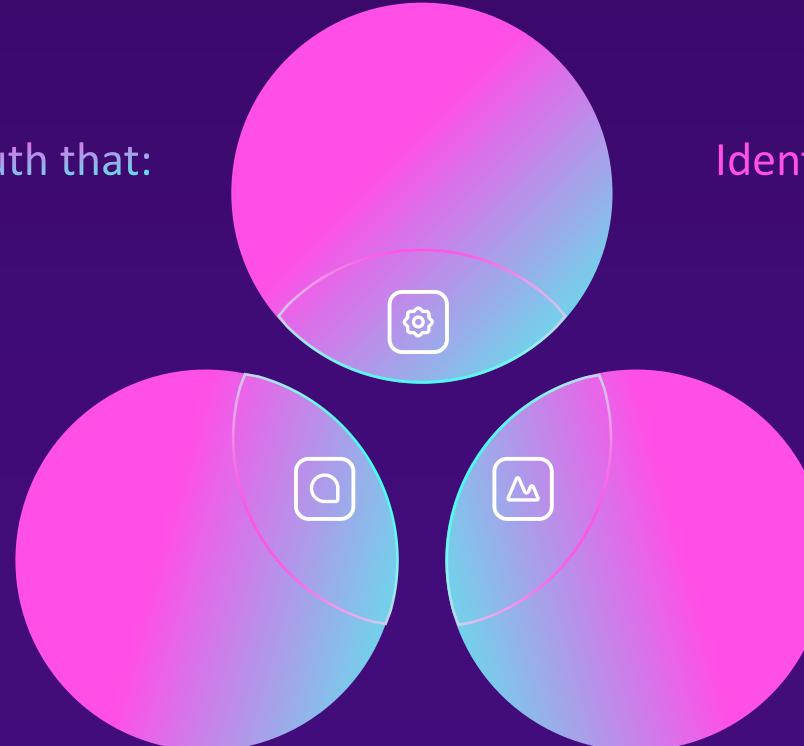

Weak payment mode optimization

# Project Objective

To design a single source of truth that:

Identifies strengths & weaknesses:

Provides real-time performance insights

Supports smart decisions in sales,  
inventory & marketing

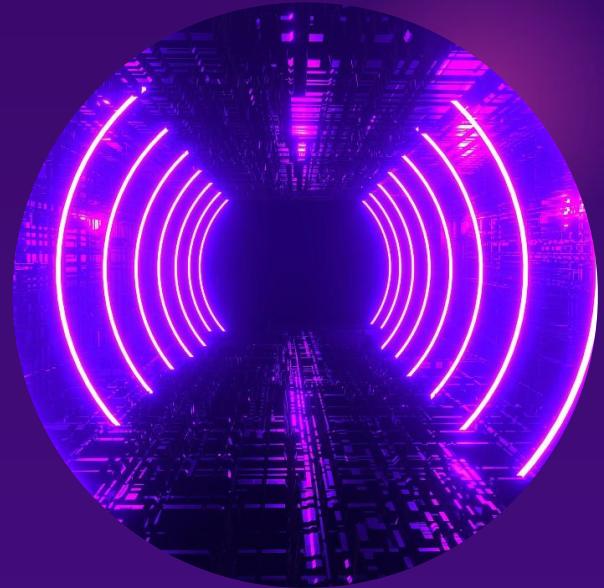

# Data Preparation

Steps followed:

- Cleaning & handling missing values
- Standardizing product, region, city, payment fields
- Transforming raw transactions into structured data
- Ready for dashboard reporting

# Business Performance Insights

## 1. Category & Product

- Top-performing vs low-performing categories
- Best-selling & low-selling products
- Action: Boost winners, improve/phase out underperformers

## 2. Region & State

- High vs low revenue regions
- State-level insights for inventory & campaigns

## 3. Company & Pricing

- Brand-wise performance comparisons
- Pricing trends & impact on sales
- Action: Manage partnerships & adjust pricing strategies

# Customer & Market Insights

## 1. Sales Target Achievement

- Gap between actual vs target performance
- Action: Early shortfall detection & strategy adjustment

## 2. Payment Modes

- Preferences: COD, UPI, Card, Wallets
- Action: Optimize checkout flow & offer incentives

## 3. Demographics (Gender & City)

- Male vs Female buying behavior □ □
- Top cities driving highest revenue □ □
- Action: Run targeted promotions & hyperlocal campaigns

# Solutions Proposed

Boost Strong Segments →  
More ads, stock, push

Payment Optimization →  
Promote preferred modes,  
balance fees

Fix Weak Segments →  
Offers, combos, drop poor  
items

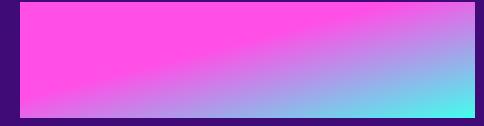

Gender Offers →  
Campaigns for  
Male/Female buyers

Bridge Gaps → Track  
shortfalls, tweak strategy

Gender & city-based  
targeting

Local Marketing →  
State/region offers,  
events

City Focus → Local ads,  
quick delivery

# What It Shows

E-commerce data flow expertise

Dashboard & Excel skills

Pattern & insight discovery

Real solutions, not just numbers

Business mindset & storytelling

# Dashboard Highlights

- Fully interactive, drill-down views
- Dynamic filtering (by category, region, payment)
- Clear visual storytelling for decision-makers

• o o o o

2025

# Excel Project Features

01. Pivot tables & charts

02. Dynamic summaries

03. Scenario analysis

04. Easy-to-use for managers

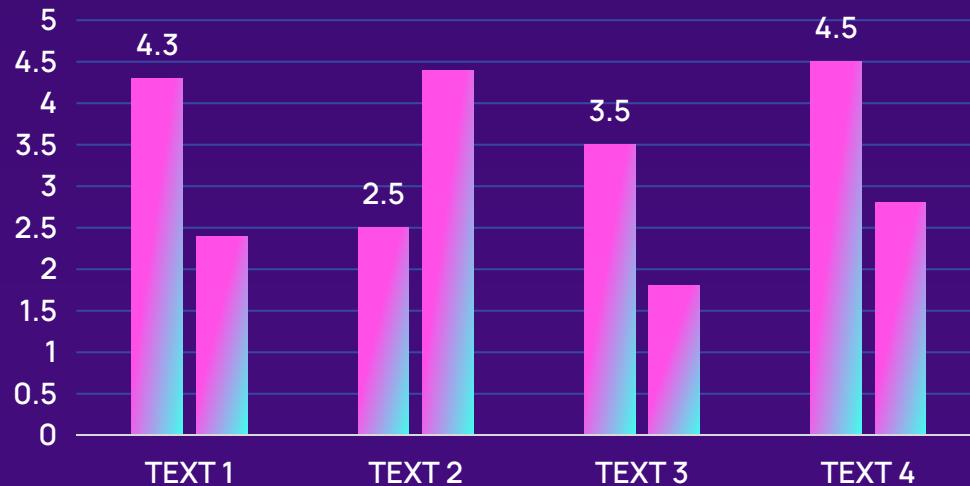

# Tools & Skills Used

## Tools:

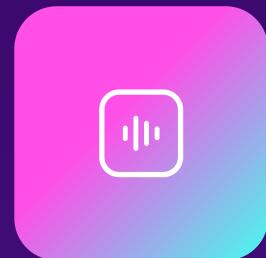

- Excel (cleaning, formulas, pivots, visualization)

## Skills:

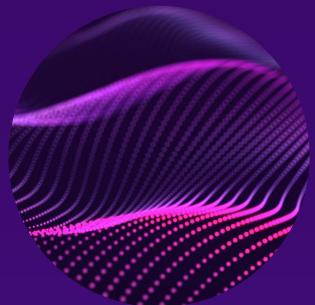

- Business Analysis
- Data Cleaning & Transformation
- Sales Performance Tracking
- Interactive Dashboards
- Storytelling with Data

100%

# Key Takeaway & Conclusion

Dashboard converts raw data → clear actions

Supports growth,  
strategy & efficiency

Scalable for any  
E-commerce business

-Proves ability to deliver Data-Driven Decision Support

# Thank You!
